General Assembly

Web Development Immersive Student | March - June 2017

Learned full-stack web development in a fast-paced, hands-on 12-week course. Designed and developed web applications with the use of RESTful APIs and frameworks such as Ruby on Rails and AngularJS.

Tower of Hanoi. A mathematical puzzle where the objective is to move a stack of disks from one rod to another. There are three rules: only one disk can be moved at a time, every move involves taking the top disk from one of the stacks and placing it on top of another stack, and no disk can be put on top of a smaller disk.

Soccer League Full stack application. built in Rails have two models with one association. Utilize an ORM to create a database table structure and interact with stored relational data.

The Match.SPA with an Angular Front-end and Rails Back-end. Contain a backend API with at least two models.

Assistant Soccer Coach Washington DC May 2008-2016

Teach 15-20 Kids age 8-14 years old weekly
